

Pomphuisje 2 Radio Kootwijk

Grasnapolsky Festival, 2018, Radio Kootwijk, the Netherlands
LED strips, aluminium profiles, computer, 18 x 3 x 3 m.

Light installation specially made for waterpump station nummer two located at Radio Kootwijk. The spiral staircase that reaches a depth of 18 meters is the starting point of this artwork. On the steps of this staircase, light lines have been placed which scan the architecture of the pumping station pit. The light lines were programmed in a way to make a movement that comes from far from the depth to the top, a link to the function of the building.
